Walmart U.S. Q4 comps <sup>1</sup> grew 2.6% and Walmart U.S. eCommerce sales grew 23%, Walmart U.S. full year comps <sup>1</sup> grew 2.1% and Walmart U.S. eCommerce sales grew 44%, Fiscal year 2018 GAAP EPS of \$3.28; Adjusted EPS <sup>2</sup> of \$4.42, Company expects fiscal 2019 EPS of \$4.75 to \$5.00

### Fourth-quarter highlights

- GAAP EPS was \$0.73 and adjusted EPS 2 was \$1.33.
- Total revenue was \$136.3 billion, an increase of \$5.3 billion, or 4.1%. Excluding currency 2, total revenue was \$135.1 billion, an increase of \$4.1 billion, or 3.1%.
- Walmart U.S. comp sales <sup>1,2</sup> increased 2.6%, and comp traffic increased 1.6%. On a two-year stack, comp sales growth of 4.4% marked the best performance in eight years.
- eCommerce sales and GMV <sup>3</sup> at Walmart U.S. increased 23% and 24%, respectively.
- Sam's Club comp sales, excluding fuel <sup>2</sup>, increased 2.4% led by comp traffic growth of 4.3%.
- Net sales at Walmart International were \$33.1 billion, an increase of 6.7%. Excluding currency <sup>2</sup>, net sales were \$31.9 billion, an increase of 2.8%. Nine of eleven markets posted positive comp sales, including our four largest markets.

"We have good momentum in the business with solid sales growth across Walmart U.S., Sam's Club and International. We're making real progress putting our unique assets to work to serve customers in all the ways they want to shop, and I want to thank our associates for their great work this past year. We're making decisions to position the business for success and investing to win with customers and shareholders."

Doug McMillon
President and CEO, Walmart

Consolidated operating income was \$4.5 billion, a decrease of 28%. Excluding the impact of discrete charges detailed in this press release, operating income would have decreased less than 1.0 percent.

### Fiscal 2018 highlights

- Total revenue was \$500.3 billion, an increase of \$14.5 billion, or 3.0%. Excluding currency 2, total revenue was \$500.9 billion, an increase of \$15.1 billion, or 3.1%.
- eCommerce sales and GMV <sup>3</sup> at Walmart U.S. increased 44% and 47%, respectively.
- Consolidated operating income was \$20.4 billion, a decrease of 10.2%. Excluding the impact of discrete charges detailed in this press release, operating income would have been relatively flat.
- The company generated \$28.3 billion in operating cash flow and returned \$14.4 billion to shareholders through dividends and share repurchases.

#### **Tax Reform**

On December 22, 2017, the 2017 Tax Cuts and Jobs Act (the "Tax Act") was enacted into law and contains several key tax provisions that affected us, including a one-time mandatory transition tax on accumulated foreign earnings and a reduction of the U.S. corporate income tax rate to 21 percent, effective January 1, 2018. The Securities and Exchange Commission (SEC) staff subsequently issued Staff Accounting Bulletin No. 118 (SAB 118), allowing companies to record provisional amounts during a measurement period not to extend beyond one year of the enactment date while the accounting impact is still under analysis. We are currently analyzing the accounting impact of the Tax Act, but our analysis is incomplete. As a result, we have recorded a provisional benefit of \$207 million for both the fourth quarter and full year. We expect to complete our work within the allowed measurement period.

### **Fiscal 2019 Full Year Guidance**

The following guidance reflects the company's expectations for full year fiscal 2019.

- Comp sales for the 52-week period ending Jan. 25, 2019:
  - Walmart U.S. (ex. fuel <sup>1</sup>): at least +2.0%
  - Sam's Club (ex. fuel & tobacco <sup>1</sup>): +3.0% to +4.0%
    - Excludes tobacco, which represents a negative impact to comp sales of approximately 400 basis points
- Consolidated net sales growth in constant currency of 1.5% to 2.0%, negatively impacted by:
  - Sam's Club closures and the decision to remove tobacco from certain clubs
  - Decision to wind-down first-party eCommerce business in Brazil and the divestiture of Suburbia
- Walmart U.S. eCommerce sales growth: approximately 40%
- EPS: \$4.75 to \$5.00, including a benefit of approximately \$0.05 from currency based on current rates
- Capital expenditures: approximately \$11.0 billion
- Effective tax rate: between 24% and 26%

### Forward-Looking Statements

This release contains statements as to Walmart management's guidance regarding earnings per share, consolidated net sales growth, Walmart U.S. eCommerce sales growth, capital expenditures and Walmart's effective tax rate for the fiscal year ending January 31, 2019, and Walmart U.S.'s comparable sales (excluding fuel) and Sam's Club's comparable sales (excluding fuel and tobacco) for the 52 weeks ending January 25, 2019. Walmart believes such statements are "forward-looking statements" as defined in, and are intended to enjoy the protection of the safe harbor for forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Assumptions on which such forward-looking statements are based are also forward-looking statements. Walmart's actual results may differ materially from the guidance provided as a result of changes in circumstances, assumptions not being realized or other risks, uncertainties and factors including:

- · economic, geo-political, capital markets and business conditions, trends and events around the world and in the markets in which Walmart operates;
- · currency exchange rate fluctuations, changes in market interest rates and commodity prices;
- · unemployment levels;
- competitive pressures;
- inflation or deflation, generally and in particular product categories;
- consumer confidence, disposable income, credit availability, spending levels, shopping patterns, debt levels and demand for certain merchandise:
- consumer enrollment in health and drug insurance programs and such programs' reimbursement rates;
- the amount of Walmart's net sales denominated in the U.S. dollar and various foreign currencies;
- · the impact of acquisitions, investments, divestitures, store or club closures, and other strategic decisions;
- Walmart's ability to successfully integrate acquired businesses, including within the eCommerce space;
- Walmart's effective tax rate and the factors affecting Walmart's effective tax rate, including assessments of certain tax contingencies, valuation allowances, changes in law (including the Tax Act), administrative audit outcomes, impact of discrete items and the mix of earnings between the U.S. and Walmart's international operations;
- customer traffic and average ticket in Walmart's stores and clubs and on its eCommerce websites;
- the mix of merchandise Walmart sells, the cost of goods it sells and the shrinkage it experiences;
- · the amount of Walmart's total sales and operating expenses in the various markets in which it operates;
- · transportation, energy and utility costs and the selling prices of gasoline and diesel fuel;
- · supply chain disruptions and disruptions in seasonal buying patterns;
- consumer acceptance of and response to Walmart's stores, clubs, digital platforms, programs, merchandise offerings and delivery methods;
- cyber security events affecting Walmart and related costs;
- · developments in, outcomes of, and costs incurred in legal or regulatory proceedings to which Walmart is a party;
- casualty and accident-related costs and insurance costs;
- · the turnover in Walmart's workforce and labor costs, including healthcare and other benefit costs;
- · changes in accounting estimates or judgments;
- · changes in existing tax, labor and other laws and regulations and changes in tax rates, trade agreements,
- trade restrictions and tariff rates;
- · the level of public assistance payments;
- natural disasters, public health emergencies, civil disturbances, and terrorist attacks; and
- Walmart's expenditures for Foreign Corrupt Practices Act "FCPA" and other compliance related costs, including the adequacy of the accrual with respect to this matter made in the third quarter of the fiscal year ending January 31, 2018.

Such risks, uncertainties and factors also include the risks relating to our operations and financial performance discussed in our filings with the SEC. You should read this release in conjunction with our Annual Report on Form 10-K for the year ended January 31, 2017, and our subsequently filed Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. You should consider all of the risks, uncertainties and other factors identified above and in those SEC reports carefully when evaluating the forward-looking statements in this release. We cannot assure you that the future results reflected in or implied by any such forward-looking statement will be realized or, even if substantially realized, will have the forecasted or expected consequences and effects for or on our operations or financial performance. Such forward-looking statements are made as of the date of this release, and Walmart undertakes no obligation to update such statements to reflect subsequent events or circumstances.

### Reconciliations of and Other Information Regarding Non-GAAP Financial Measures (Unaudited)

The following information provides reconciliations of certain non-GAAP financial measures presented in the press release to which this reconciliation is attached to the most directly comparable financial measures calculated and presented in accordance with generally accepted accounting principles (GAAP). The company has provided the non-GAAP financial information presented in the press release, which is not calculated or presented in accordance with GAAP, as information supplemental and in addition to the financial measures presented in the press release that are calculated and presented in accordance with GAAP. Such non-GAAP financial measures should not be considered superior to, as a substitute for or alternative to, and should be considered in conjunction with, the GAAP financial measures presented in the press release. The non-GAAP financial measures in the press release may differ from similar measures used by other companies.

### **Constant Currency**

In discussing our operating results, the term currency exchange rates refers to the currency exchange rates we use to convert the operating results for all countries where the functional currency is not the U.S. dollar into U.S. dollars. We calculate the effect of changes in currency exchange rates as the difference between current period activity translated using the current period's currency exchange rates, and the comparable prior year period's currency exchange rates. Throughout our discussion, we refer to the results of this calculation as the impact of currency exchange rate fluctuations. When we refer to constant currency operating results, this means operating results without the impact of the currency exchange rate fluctuations. The disclosure of constant currency amounts or results permits investors to better understand Walmart's underlying performance without the effects of currency exchange rate fluctuations.

The table below reflects the calculation of constant currency for total revenues, net sales and operating income for the three and twelve months ended January 31, 2018.

#### Free Cash Flow

We define free cash flow as net cash provided by operating activities in a period minus payments for property and equipment made in that period. We had net cash provided by operating activities of \$28.3 billion and \$31.7 billion for the twelve months ended January 31, 2018 and 2017, respectively. We generated free cash flow of \$18.3 billion and \$21.1 billion for the twelve months ended January 31, 2018 and 2017, respectively. The decreases in net cash provided by operating activities and free cash flow were due to the timing of tax and other payments, as well as lapping prior year's improvements in working capital management.

Free cash flow is considered a non-GAAP financial measure. Management believes, however, that free cash flow, which measures our ability to generate additional cash from our business operations, is an important financial measure for use in evaluating the company's financial performance. Free cash flow should be considered in addition to, rather than as a substitute for, consolidated net income as a measure of our performance and net cash provided by operating activities as a measure of our liquidity.

Additionally, Walmart's definition of free cash flow is limited, in that it does not represent residual cash flows available for discretionary expenditures, due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, we believe it is important to view free cash flow as a measure that provides supplemental information to our Consolidated Statements of Cash Flows.

Although other companies report their free cash flow, numerous methods may exist for calculating a company's free cash flow. As a result, the method used by Walmart's management to calculate our free cash flow may differ from the methods used by other companies to calculate their free cash flow.

The following table sets forth a reconciliation of free cash flow, a non-GAAP financial measure, to net cash provided by operating activities, which we believe to be the GAAP financial measure most directly comparable to free cash flow, as well as information regarding net cash used in investing activities and net cash used in financing activities.

### **Adjusted EPS**

Adjusted diluted earnings per share from continuing operations attributable to Walmart (Adjusted EPS) for each of the three months and fiscal years ended January 31, 2018 and 2017 is considered a non-GAAP financial measure under the SEC's rules because the Adjusted EPS for each such period excludes certain amounts not excluded in the diluted earnings per share from continuing operations attributable to Walmart calculated in accordance with GAAP (EPS) for such periods. Management believes that the Adjusted EPS for each of the three months and fiscal years ended January 31, 2018 and 2017 is a meaningful measure to share with investors because each measure, which adjusts EPS for such periods for certain items recorded in such periods, is the measure that best allows comparison of the performance for the comparable period. In addition, Adjusted EPS affords investors a view of what management considers Walmart's core earnings performance for each of the three months and fiscal years ended January 31, 2018 and 2017 and also affords investors the ability to make a more informed assessment of such core earnings performance for the comparable periods.

We have calculated Adjusted EPS for the three months and fiscal year ended January 31, 2018 by adjusting EPS for the following: (1) restructuring charges, (2) losses on the early extinguishment of certain debt, (3) asset impairments and write-offs, (4) U.S. associate lump sum bonuses, (5) the impact of U.S. tax reform, (6) a legal settlement recovery and, for the fiscal year ended January 31, 2018 only, the (7) the FCPA accrual based on discussions with government agencies regarding the possible resolution of the FCPA matter and (8) the gain on sale of Suburbia.

Adjusted EPS for the three months ended January 31, 2018 is a non-GAAP financial measure. The most directly comparable financial measure calculated in accordance with GAAP is EPS for the three months ended January 31, 2018 .

### **Non-GAAP Comparable Sales Measures**

Reported EPS

The comparable sales of the company's Walmart U.S. and Sam's Club operating segments for the 13-week and 52-week periods ended January 26, 2018 and January 27, 2017, and our guidance for comparable sales for the 52-week period ending January 25, 2019, in each case calculated or forecasted by excluding fuel or fuel and tobacco sales for such periods (collectively the "Non-GAAP Comparable Sales Measures"), are non-GAAP financial measures as defined by the SEC's rules. We believe the most directly comparable financial measures computed in accordance with GAAP are the comparable sales calculated by including fuel and tobacco sales for the corresponding periods.

We believe that the presentation of the Non-GAAP Comparable Sales Measures provides useful information to investors regarding the company's financial condition and results of operations because that information permits investors to understand the impact of fuel or fuel and tobacco sales, which are affected by the volatility of fuel prices and Sam's Club's decision to remove tobacco from certain locations, on Walmart U.S. and Sam's Club's comparable sales for the periods presented.

### Walmart U.S. - quarterly financial highlights

### Sales

- Comp sales<sup>1</sup> increased 2.6% led by strong comp traffic of 1.6%. eCommerce contributed approximately 60 basis points to segment comp sales growth. On a 2-year stack basis, comp sales and traffic were up 4.4% and 3.0%, respectively.
- Strong performance in food categories continued with comp sales, traffic and unit growth across categories.
- · Strong growth in multi-channel sales continued, including online grocery and general merchandise pickup in store.

#### Gross Margin

Gross margin rate declined 50 basis points due primarily to price investments, higher transportation expense as a result of higher volumes and fuel
costs, and mix effects from our growing eCommerce business. For the full year, the gross margin rate declined 24 basis points.

#### Expenses

- Segment operating expenses leveraged 19 basis points. Physical stores leveraged expenses for the 4<sup>th</sup> consecutive quarter and were partially offset by investments in eCommerce and technology.
- This year's Q4 results included a \$244 million discrete charge related to discontinued real estate projects, which was partially offset by a \$137 million legal settlement recovery. Last year's Q4 results included a \$249M discrete charge related to discontinued real estate projects. Excluding these adjustments, expenses would have leveraged slightly.

#### Inventory

Total inventory increased 0.1% versus last year and comp store inventory declined approximately 0.2%, while in-stock levels remained high.

#### Format growth

- · We had net openings of 9 Supercenters and no Neighborhood Markets. We also remodeled 53 stores in the quarter and 496 for the full year.
- As of the end of Q4, online grocery was offered in over 1,100 locations, which represents more than 500 additional locations since last year.

Comp sales for the 13-week period ended January 26, 2018, excluding fuel. Including fuel, Walmart U.S. comparable sales grew 2.7%. See press release located at www.stock.walmart.com and reconciliations at the end of this presentation regarding non-GAAP financial measures.

## Walmart U.S. - quarterly merchandise highlights

Category	Comp	Comments
Grocery <sup>1</sup>	+ low single-digit	Food and consumables had solid comp sales driven by strong customer traffic. Strength was broad-based across categories, with fresh foods, packaged goods and private brands particularly strong driven by improvements in assortment, quality and price.
Health & wellness	+ mid single-digit	An elevated cold, cough and flu season drove strong comp performance in over-the-counter and pharmacy sales. The pharmacy business continues to benefit from branded drug inflation and script growth.
General merchandise <sup>2</sup>	+ low single-digit	Overall, sales results were driven by seasonal, toys and apparel. Entertainment had its strongest quarter of the year with strong holiday sales. Women's apparel and shoes had strong results as customers responded favorably to the newness across categories.

### Walmart International - quarterly financial highlights

### Sales

- Net sales on a constant currency basis increased 2.8 percent.
  - Reported net sales increased 6.7 percent, which included a benefit of approximately \$1.2 billion from currency.
- The divestitures of Suburbia and Yihaodian created a headwind to sales of about \$400 million when compared to last year.
- Nine of 11 markets delivered positive comp sales.

#### Gross Margin

Gross margin rate declined 75 basis points driven by price investments in certain markets, winding down our first-party Brazil
eCommerce business and some unplanned items in two markets. The first-party Brazil eCommerce business wind down and the
unplanned items collectively contributed more than half of the gross margin decline.

#### Operating income

- Operating income in the quarter declined 16.1 percent on a constant currency basis and 10.9 percent on a reported basis.
  - On a constant currency basis, restructuring and impairment charges of approximately \$400 million impacted operating income
    during the quarter, which was offset by a net \$100 million impact in the comparable prior year period. Without these items,
    operating income would have increased year-over-year

#### Inventory

· During the quarter, inventory grew more slowly than sales.

See press release located at www.stock.walmart.com and reconciliations at the end of this presentation regarding non-GAAP financial measures.

On a reported basis, restructuring and impairment charges were also approximately \$400 million during the quarter.

Comp sales for the United Kingdom are presented excluding fuel.

Walmex includes the consolidated results of Mexico and Central America. Excluding Suburbia net sales of \$270 million in the comparable prior year period would result in an increase in Walmex net sales of 7.9% for the quarter. Excluding Suburbia operating income of approximately \$50 million in the comparable prior year period, operating income would have increased.

### Walmart International - key market highlights

### Walmex

- Net sales in the quarter increased 4.3 percent and comp sales increased 6.1 percent. Normalizing for Suburbia<sup>2</sup> sales last year, net sales would have increased 7.9 percent.
- · In Mexico specifically, comp sales increased 6.4 percent in the quarter or 14.3 percent on a two-year stacked basis.
  - For the year all of our merchandise divisions outpaced ANTAD<sup>1</sup> self-service and our strongest performance came from our key Food and Staples business.
  - · From a format perspective, our strongest performance for the year came from Sam's Club followed by our Bodega format.
- Net sales in the quarter in Central America increased 9.2 percent, and all countries delivered positive comp sales.

### Canada

- Net sales in the quarter increased 3.4 percent while comp sales increased 2.9 percent.
- We gained 60 basis points of market share in food, consumables, and health and wellness for the 12-week period ended January 27, according to Nielsen.
- Gross profit rate declined primarily driven by price investments.
- We leveraged operating expenses during the quarter through sales growth and continued cost control.
- Inventory levels decreased even as sales increased 3.4 percent.

<sup>1</sup> ANTAD - Asociación Nacional de Tiendas de Autoservicio y Departamentales; The National Association of Supermarkets and Department Stores
<sup>2</sup> Excluding Suburbia net sales of \$270 million in the comparable prior year period would result in an increase in Walmex net sales of 7.9% for the quarter.

### Walmart International - key market highlights

#### U.K.

- During the quarter, net sales increased 2.0 percent, while comp sales increased 0.5 percent.
- During the quarter, we experienced improved in-store service scores and performance strengthened across our private brand and online grocery offerings.
- · Gross profit rate in the quarter declined driven by on-going price investments.

### China

- Net sales increased 4.1 percent while comp sales increased 2.3 percent.
  - · Our omni channel initiatives drove strength within our hypermarket format and fresh continues to be a key growth driver.
- · Approximately 160 Walmart stores now offer grocery delivery through JD Daojia.
- During the quarter, we continued to expand our assortment of items available from the U.S., Japan and the U.K. through our Walmart global imports store on the JD.com platform.
- Since the launch of our digital Sam's Club membership through WeChat, the majority of our new members have been acquired through this offering.

<sup>&</sup>lt;sup>3</sup> Comp sales for the 13-week and 52-week periods ended January 26, 2018.

### Sam's Club - quarterly financial highlights

#### Sales

- Comp sales<sup>1</sup> for the period increased 2.4% with growth in comp traffic of 4.3%. Tobacco negatively impacted comp sales by approximately 120 basis points.
- · In eCommerce, both Club Pickup and the direct to home business continued to have strong results.
- Penetration of the Members Mark brand continues to increase.

#### **Gross Profit**

Excluding fuel<sup>1</sup>, gross profit rate declined 89 basis points. Club closures negatively impacted gross profit rate by approximately 93 basis points, primarily as a result of markdowns to liquidate inventory. Consistent with previous quarters, certain fresh supply expenses were reclassified from operating expenses to cost of goods sold.

### Operating Expenses

Operating expenses de-levered 347 basis points, primarily due to a charge of approximately \$565 million related to club closures and discontinued real
estate projects. The charge was partially offset by an approximately \$13 million legal settlement recovery.

### Membership Income

Membership income increased 1.9% versus last year. Plus penetration increased 9 basis points.

#### Inventory

Inventory decreased 1.1%, primarily due to club closures. Inventory at comp clubs increased 4.2%.

1 Gross profit including fuel declined 93 basis points.

#### Non-GAAP measures - ROI

We include Return on Assets ("ROA"), which is calculated in accordance with generally accepted accounting principles in the U.S. ("GAAP") as well as Return on Investment ("ROI") as measures to assess returns on assets. Management believes ROI is a meaningful measure to share with investors because it helps investors assess how effectively Walmart is deploying its assets. Trends in ROI can fluctuate over time as management balances long-term potential strategic initiatives with possible short-term impacts. We consider ROA to be the financial measure computed in accordance with GAAP that is the most directly comparable financial measure to our calculation of ROI.

ROA was 5.2 percent and 7.2 percent for the trailing twelve months ended January 31, 2018 and 2017, respectively. ROI was 14.2 percent and 15.2 percent for the trailing twelve months ended January 31, 2018 and 2017, respectively. The decline in ROA was primarily due to the losses on extinguishment of debt and the decrease in operating income. The decline in ROI was primarily due to the decrease in operating income.

We define ROI as adjusted operating income (operating income plus interest income, depreciation and amortization, and rent expense) for the trailing 12 months divided by average invested capital during that period. We consider average invested capital to be the average of our beginning and ending total assets, plus average accumulated depreciation and average amortization, less average accounts payable and average accrued liabilities for that period, plus a rent factor equal to the rent for the fiscal year or trailing 12 months multiplied by a factor of 8. When we have discontinued operations, we exclude the impact of the discontinued operations.

Our calculation of ROI is considered a non-GAAP financial measure because we calculate ROI using financial measures that exclude and include amounts that are included and excluded in the most directly comparable GAAP financial measure. For example, we exclude the impact of depreciation and amortization from our reported operating income in calculating the numerator of our calculation of ROI. In addition, we include a factor of 8 for rent expense that estimates the hypothetical capitalization of our operating leases. As mentioned above, we consider return on assets to be the financial measure computed in accordance with generally accepted accounting principles most directly comparable to our calculation of ROI. ROI differs from ROA (which is consolidated net income for the period divided by average total assets for the period) because ROI: adjusts operating income to exclude certain expense items and adds interest income; adjusts total assets for the impact of accumulated depreciation and amortization, accounts payable and accrued liabilities; and incorporates a factor of rent to arrive at total invested capital. Because of the adjustments mentioned above, we believe ROI more accurately measures how we are deploying our key assets and is more meaningful to investors than ROA.

Although ROI is a standard financial measure, numerous methods exist for calculating a company's ROI. As a result, the method used by management to calculate our ROI may differ from the methods used by other companies to calculate their ROI.

## Non-GAAP measures - ROI cont.

The calculation of ROA and ROI, along with a reconciliation of ROI to the calculation of ROA, the most comparable GAAP financial measure, is as follows:

<sup>&</sup>lt;sup>1</sup> The average is based on the addition of the account balance at the end of the current period to the account balance at the end of the prior period and dividing by 2.

#### Non-GAAP measures - free cash flow

We define free cash flow as net cash provided by operating activities in a period minus payments for property and equipment made in that period. We had net cash provided by operating activities of \$28.3 billion and \$31.7 billion for the twelve months ended January 31, 2018 and 2017, respectively. We generated free cash flow of \$18.3 billion and \$21.1 billion for the twelve months ended January 31, 2018 and 2017, respectively. The decreases in net cash provided by operating activities and free cash flow were due to the timing of tax and other payments, as well as lapping prior year's improvements in working capital management.

Free cash flow is considered a non-GAAP financial measure. Management believes, however, that free cash flow, which measures our ability to generate additional cash from our business operations, is an important financial measure for use in evaluating the company's financial performance. Free cash flow should be considered in addition to, rather than as a substitute for, consolidated net income as a measure of our performance and net cash provided by operating activities as a measure of our liquidity. Additionally, Walmart's definition of free cash flow is limited, in that it does not represent residual cash flows available for discretionary expenditures, due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, we believe it is important to view free cash flow as a measure that provides supplemental information to our Consolidated Statements of Cash Flows.

The following table sets forth a reconciliation of free cash flow, a non-GAAP financial measure, to net cash provided by operating activities, which we believe to be the GAAP financial measure most directly comparable to free cash flow, as well as information regarding net cash used in investing activities and net cash used in financing activities.

<sup>1</sup> Reclassifications made due to the adoption of ASU 2016-09, Improvements to Employee Share-Based Payment Accounting.

<sup>&</sup>lt;sup>2</sup> "Net cash used in investing activities" includes payments for property and equipment, which is also included in our computation of free cash flow.

## Non-GAAP measures - constant currency

In discussing our operating results, the term currency exchange rates refers to the currency exchange rates we use to convert the operating results for all countries where the functional currency is not the U.S. dollar into U.S. dollars. We calculate the effect of changes in currency exchange rates as the difference between current period activity translated using the current period's currency exchange rates, and the comparable prior year period's currency exchange rates. Throughout our discussion, we refer to the results of this calculation as the impact of currency exchange rate fluctuations. When we refer to constant currency operating results, this means operating results without the impact of the currency exchange rate fluctuations. The disclosure of constant currency amounts or results permits investors to better understand Walmart's underlying performance without the effects of currency exchange rate fluctuations.

The table below reflects the calculation of constant currency for total revenues, net sales and operating income for the three and twelve months ended January 31, 2018.

## Non-GAAP measures - comparable sales measures

The comparable sales of the company's Walmart U.S. and Sam's Club operating segments for the 13-week and 52-week periods ended January 26, 2018 and January 27, 2017, and our guidance for comparable sales for the 52-week period ending January 25, 2019, in each case calculated or forecasted by excluding fuel or fuel and tobacco sales for such periods (collectively the "Non-GAAP Comparable Sales Measures"), are non-GAAP financial measures as defined by the SEC's rules. We believe the most directly comparable financial measures computed in accordance with GAAP are the comparable sales calculated by including fuel and tobacco sales for the corresponding periods.

We believe that the presentation of the Non-GAAP Comparable Sales Measures provides useful information to investors regarding the company's financial condition and results of operations because that information permits investors to understand the impact of fuel or fuel and tobacco sales, which are affected by the volatility of fuel prices and Sam's Club's decision to remove tobacco from certain locations, on Walmart U.S. and Sam's Club's comparable sales for the periods presented.

## Non-GAAP measures - adjusted EPS

Adjusted diluted earnings per share from continuing operations attributable to Walmart (Adjusted EPS) for each of the three months and fiscal years ended January 31, 2018 and 2017 is considered a non-GAAP financial measure under the SEC's rules because the Adjusted EPS for each such period excludes certain amounts not excluded in the diluted earnings per share from continuing operations attributable to Walmart calculated in accordance with GAAP (EPS) for such periods. Management believes that the Adjusted EPS for each of the three months and fiscal years ended January 31, 2018 and 2017 is a meaningful measure to share with investors because each measure, which adjusts EPS for such periods for certain items recorded in such periods, is the measure that best allows comparison of the performance for the comparable period. In addition, Adjusted EPS affords investors a view of what management considers Walmart's core earnings performance for each of the three months and fiscal years ended January 31, 2018 and 2017 and also affords investors the ability to make a more informed assessment of such core earnings performance for the comparable periods.

We have calculated Adjusted EPS for the three months and fiscal year ended January 31, 2018 by adjusting EPS for the following: (1) restructuring charges, (2) losses on the early extinguishment of certain debt, (3) asset impairments and write-offs, (4) U.S. associate lump sum bonuses, (5) the impact of U.S. tax reform, (6) a legal settlement recovery and, for the fiscal year ended January 31, 2018 only, the (7) the FCPA accrual based on discussions with government agencies regarding the possible resolution of the FCPA matter and (8) the gain on sale of Suburbia.

Adjusted EPS for the three months ended January 31, 2018 is a non-GAAP financial measure. The most directly comparable financial measure calculated in accordance with GAAP is EPS for the three months ended January 31, 2018.
